

# *Spa mist II*

## Hair Care Is the Root of All Beauty

Sleek, supple hair that reflects ideas of the stylist in every detail.

Hairstyles that customers hold in admiration.

That kind of beauty only comes with healthy hair, when each strand is soft and supple to the tip.

Spa Mist II uses a soft, microscopic mist that penetrates the scalp and hair—and the customer's soul.

Used with treatments like the Head Spa for giving clients all-round, feel-good hair care, or with hair coloring or a perm, Spa Mist II helps you care for hair so clients leave looking and feeling beautiful.

*Spa mist II*

## Control the Temperature and Quantity of Mist — Helping You Provide the Best Head Spa and Treatment Experience

Spa Mist II was developed with a focus on using the power of mist with its tremendous potential. An ultrasonic transducer vibrating at 1.6 million times a second generates a fine mist of microscopic water particles.

The temperature and quantity of the mist can be freely controlled and used for relaxation treatments like the Head Spa, as well as acid hair coloring and perms. Hair is set gently and with great care.

Spa Mist II is highly functional yet compact. And its sleek cubic design is well matched with the décors of high-end salon spaces.

POINT  
01

Uniform heating for a consistent finish

Mist fills the cap, infusing the hair with moisture and uniform warmth. Surrounded by a gentle mist, every strand of hair is naturally infused with the cosmetic ingredients for a consistent finish.

POINT  
02

Cooling sustains the treatment

The cooling function locks the treatment particles and acid hair color into the hair. The mist heating and cooling functions combine to give longer-lasting results.

POINT  
03

Relaxation

Open Mist provides a gentle heating for comfort, along with an aroma for a soothing, high-class experience. It's relaxation taken to a new level.

# Function & Performance

Open Mist and a mist cap turn ordinary treatment into care treatment.

**OPEN MIST**

**Warmth creates comfort**

- Allows staff to more easily give customers a comfortable shampoo and scalp treatment.
- The mist and warmth combine to relax the client.

**SCALP CARE**

**Open the pores to clean scalp**

- Through moisturizing and heating, pores open to free up keratotic plugs and debris.
- With minimal burden on the scalp, debris and keratotic plugs are removed for beautiful scalp.

**HAIR CARE**

**Penetrates deep into hair for longer-lasting effect**

- Opens the cuticle layers so that treatment particles can go deep into the hair.
- Cooling closes the cuticles to keep hair healthy.

**COLOR**

**Even coloring, minimal fading**

- The microscopic mist is sent into the cap, where it circulates surrounding every hair strand with heat and ensuring an even finish.
- Cooling fixates the acid hair color into the hair for longer-lasting results.

**PERM**

**Beautiful ridges in a short time**

- Uniform heating gently promotes the softening process throughout the hair.
- Creates beautiful ridges in minimal time.

**HAND CARE**

**Moist, soft hands**

- Heated mist enhances the cleansing and moisturizing of hands.
- Brings added value to hand care services.

**Hair temperature change (during shampoo)**

**Without Open Mist**

- Hair gradually cools, resulting in not only less lather but also cold lather.
- The client feels cold.

**With Open Mist**

- More shampoo lather is generated and the stylist's hands slide easily.
- The client gets a warm, comfortable feeling right to behind the ears.

**State of pores and scalp**

**Before treatment**

Hardened sebum clogs the pores.

**Mist heating**

Moisture spreads throughout the scalp, opening the pores and turning the sebum into a liquid.

8 minutes of heating, 48°C

**After shampoo**

Debris is removed, and the pores are open and clean.

**Level of penetration and durability**

Data 1, 2, and 3 are based on tests in which the dyeing capacity and level of penetration on a hair bundle are assessed using acid dye on human grey hairs.

**Data (1): Surface comparison (after applying dye)**

Immediately After 7 shampoos after treatment

With mist treatment Heating: 15 min. Cooling: 5 min.

Without mist treatment

The blue dye adheres well, and there is little color loss even after 7 shampoos.

**Data (2): Cross section comparison (after applying dye)**

Immediately After 7 shampoos after treatment

With mist treatment Heating: 15 min. Cooling: 5 min.

Without mist treatment

Large amount of blue dye has penetrated the hair. Little color loss even after 7 shampoos.

**Data (3): Comparison of dyeing capacity and lasting strength**

The hair bundle in Data 1 was measured with a spectrophotometer and a graph was made using the K/S value, which is an equivalent of the dye concentration value (absorbance value).

Immediately After 7 shampoos after treatment

Measuring the dye concentration by absorption of light, when compared to a hair bundle in which the dye sets naturally, a mist-treated hair bundle has higher dyeing capacity and greater durability just after treatment and even after seven shampoos.

**Perm wave strength (when applying perm lotion)**

Data 4 and 5 are based on tests in which a 17-mm-diameter rod and perm lotion were used to wind black human hair (damage level 3).

**Data (4): Comparison of wave strength (after applying perm lotion)**

With mist treatment

After heating 5 minutes

After heating 10 minutes

The hair bundle heated with mist for 5 minutes had more wave strength and more defined curls than the hair bundle that underwent natural setting for 10 minutes.

Without mist treatment

After 5 minutes

After 10 minutes

**Data (5): Comparison of wave strength**

Graph showing the SP efficiency of waves formed on the hair bundle in Data 4.

# Original Services

Combine treatment categories to offer a wider range of services.

**HEAD SPA**

A unique service you can only get at a salon: therapy for clients' hair, scalp, and soul.

**YUME SPA**

Meet the needs of mature clients with effective, feel-good care that's authentic yet easy to introduce and operate.

# Features & Variations

## Function

### Control Panel

### Part Names

## Design & Colors

### Stand type

### Trolley type

Convenient for use in less roomy salons.

## Options

**Open Mist Ball Nozzle**  
Just attach it to the shampoo basin for easy Open Mist treatment.

**Aromatherapy Diffuser Holder**  
Attach to the Open Mist Ball Nozzle to combine mist with a soothing aroma that enhances the client's relaxation.

## Accessories (Included with Main Unit)

| Name              | Photo | Description   | Code   |
|-------------------|-------|---|--------|
| Deionizer         |       | <ul style="list-style-type: none"> <li>Housing</li> <li>Cartridge</li> <li>Hardness tester</li> </ul> | EX-TJ5 |
| Flexible Hose     |       | 1 unit (350 to 680 mm)  |        |
| End Cap/ Coupling |       | 2 sets  |        |

Note: When the deionizer cartridge reaches its capacity and becomes exhausted, pure water will not be produced, which could cause equipment to malfunction. Check the water using the hardness tester, and replace the cartridge at regular intervals.

• Cartridge only: Code BM03416  
• Hardness tester only: Code BM03419
