

ExactTemp® Valves

Improved performance and easier installation

With precise temperature control and consistency, the ExactTemp 3/4" Thermostatic Valve and 3/4" Volume Control Valve serve as the foundation for vertical spa configurations as opulent as you can imagine. Recent design updates further enhance functionality and make these valves easier to install and service.

ExactTemp
3/4" Thermostatic Valve

Model # 3371

- Increased 17.0 gpm flow rate capacity (measured at 45 psi) makes more water available at every spray outlet.
- Improved response to thermal fluctuations from any hot or cold water pressure drop ensures a consistently maintained shower experience.
- Servicing stops and check valves is easier now that a standard Moen® tool can be used with the valve.

3/4" Volume Control Valve

Model # 3600

- New integrated mounting bracket saves time and results in a more secure installation.
- Feature on thread adapter allows for easy servicing and simple conversion to thick wall applications.
